Civilization 6

Justin's Tips

step one, tattoo this on your body in a visible location: district cheat sheet v3

step 2, specialize cities for roles, focus on one or two resources to get

step 3, figure out your win condition. You should know if you are building a space rocket, spreading religion, culturally smothering everyone, or killing everyone

Note: do step 3 before step 2

P.S.

- really just get in and push buttons
- civ is pretty hand-holdy as far as strategy games go
- just have 2 archers for every city you settle
- oh and before you spam settlers get something that boosts it... the govener or the policy card

Addison Tips

- The easiest win condition to start with is either science or conquests, imo
- Religion and culture are super fun, but I struggle with them on the harder difficulty
